

COMMUNITY STRATEGY ACTION PLAN 2006/07

1. INTRODUCTION

- 1.1 Each year an action plan is developed and delivered by each of the Community Action Networks (CANs) for each topic chapter of the Community Strategy.
- 1.2 This report sets out the proposed actions put forward by the CANs, or lead officers where the CAN does not yet exist, for consideration by the Cabinet. The submissions also include potential actions for 2007/08 and beyond.
- 1.3 The Changing Lives Partnership's Core Group received the draft action plan at its meeting on 2 March. Comments on the Plan have been requested in time for the Cabinet meeting

2. THE PROPOSED ACTIONS FOR 2006/07 AND IDEAS FOR FUTURE YEARS ACTIONS

- 2.1 Attached as an appendix are actions in respect of the following topics:

Community Safety
Economy (actions to be identified from the Economic Strategy)
Built Environment
Natural Environment
Environmental Quality & Protection (Coast Protection & Flooding, Home Energy Conservation, Pollution and Waste Management)
Health
Housing
Leisure
Tourism
Transport

- 2.2 Proposed action plans are still awaited in respect of:

Children & Young People
Lifelong Learning
Older People

- 2.3 It is hoped that two of these will be distributed in advance of the meeting – Lifelong Learning and Children & Young People.
- 2.4 Actions in respect of the Children and Young People will flow from the Children's Plan which is currently out for consultation. The Children's and Young People's CAN is looking at priority actions in March and these will be fed into the Community Strategy Action Plan.
- 2.5 In the absence of an Older Peoples CAN, relevant actions in respect of Older People will be taken from the other CANs action plans

3. CRITERIA USED FOR IDENTIFYING ACTION

3.1 Cabinet is reminded that criteria has been used to identify actions coming forward. All actions should:

- be partnership based – demonstrate real partnership working ie ranging from significant partnership discussions to partnership funding
- demonstrate need - link to one or more of the priorities in the Community Strategy
- provide significant positive impact
- have ongoing benefit
- improve at least two of the three areas of well being whilst minimizing any negative impact on the third
- be achievable

3.2 Cabinet is asked to challenge whether the proposed actions are robust enough when considering this criteria and whether other actions should be considered for inclusion in either 2006/07 or in future years.

4. CONCLUSION

4.1 The Action Planning process is important to get right if the Community Strategy is to make a real impact on the quality of life of present and future generations.

4.2 This is the Community Strategy's third annual action plan and Cabinet should be seeing more examples of actions that have been influenced by cross working between the CANs.

4.3 As 2006/07 is the final year of the current strategy the action planning process needs to ensure that all priorities have been covered during the 3 year life of the Community Strategy. 2006/07 will also be a year of review in addition to delivering the actions for that year. Priorities and criteria will all be up for debate.

5. RECOMMENDATIONS

5.1 That the Community Strategy Action Plan for 2006/07 be approved; and

5.2 That Cabinet considers any potential actions it wishes to progress during 2007/08 and beyond.

2006/07 ACTION POINTS (In priority order)	Lead agency	Target Date	Ref. No. in strategy priorities	Commentary on fit with Criteria
1. Establishment of Joint Action Groups to compliment and supersede the Divided We Fall and partnership Tasking Coordinating Group Procedures	Police	May 2006		With the implementation of the National Intelligence Model 2 and the Operational Command Units for the police, partnership groups and systems are required to capture what is described as 'Community Intelligence.' The partnership presently have two systems to tackle persistent Anti Social Behaviour issues and such community intelligence is vital to support these processes. The present systems are causing confusion and duplication of work and a single joint action group will streamline the efficiency and productivity of this area of partnership work. This group will exist for all three CDRP's within the OCU structure. The New Forest CDRP has funded analytical support for this group, a facility which has proven to be very valuable over the last 12 months. Systems will be implemented alongside this group to allow the community and all partners to 'feed' information/intelligence or referrals to this group for assessment and relevant action.
