

**SUSTAINABLE COMMUNITY STRATEGY ACTION PLANS –
2008/09 (PERFORMANCE) AND 2009/10 (DRAFT ACTIONS)****1. INTRODUCTION**

- 1.1 Each year an action plan geared to deliver against the priorities of the Sustainable Community Strategy (SCS) is developed through the various Community Action Networks (CANs) supporting the work of the Local Strategic Partnership (LSP).
- 1.2 This report sets out the performance as reported by the individual CANs against the 2008/09 actions and the proposals being put forward by the CANs for 2009/10.
- 1.3 The actions represent a small element of partnership work taking place that contribute to the SCS but are included as important actions to focus on.

2. PERFORMANCE REPORT 2008/09

- # 2.1 Attached at Appendix 1 is the assessment made by CANs about whether the actions were achieved or not.
- 2.2 57 actions were set and 42 were achieved. 40 actions were led by NFDC and 29 of these were achieved. Overall performance shows around 73% of actions were achieved (also 73% achieved where NFDC was the lead authority). This compares to previous years performance figures of around 75% for both categories.

3. DRAFT ACTION PLAN 2009/10

- # 3.1 The draft action plan is attached at Appendix 2. It shows 37 actions (Health & Well Being awaited), 24 of which are led by NFDC. It also shows which SCS priorities and outcomes the actions are contributing towards. Further work will be done to show where they contribute to Local Area Agreement Targets and National Indicators. Appendix 3 shows a summary of main links to the desired outcomes of the SCS.
- 3.2 In developing the actions, CAN Leads were encouraged to create a fewer number of targets that were SMART and where possible to develop some actions that would help deal with the current economic downturn.

4. FINANCIAL IMPLICATIONS

4.1 All proposed actions have been developed involving the relevant partners on the LSP. As such, resources are currently in place to deliver on the proposed actions.

5. ENVIRONMENTAL, CRIME & DISORDER AND EQUALITY & DIVERSITY IMPLICATIONS

5.1 Many of the actions across the various topics make a contribution to protecting the environment, improving community safety and ensuring equality in service delivery either through specific positive activity or through mitigating negative impact.

5.2 For each of these issues the SCS has a specific focus and the LSP has in place CANs that provide the multi agency resource to help achieve improvement in the community.

6. PORTFOLIO HOLDER COMMENTS

6.1 The SCS Action Plans are only a sample of a lot of good partnership work that happens in this District. It is good to see the number of partners taking part in the actions as they all have contributions to make whether that is through finance, expertise, knowledge, enthusiasm or people's time. The successful delivery of these actions will make a good contribution to what the Sustainable Community Strategy is designed to deliver and many of those actions also help deliver the Hampshire Local Area Agreement.

7. CONCLUSIONS

7.1 The delivery record of the LSP is fairly consistent. The proposed actions make a good contribution across the range of priorities and of the SCS and all planned outcomes are being targeted for action this year.

8. RECOMMENDATIONS

8.1 That Cabinet note the performance against the 2008/09 action plan and approve the SCS action plan for 2009/10 subject to any comments of the LSP

8.2 That the LSP note the performance against the 2008/09 action plan and approve the SCS action plan for 2009/10
