Dear Mr Stone

I am writing this letter as requested which may help you with your decision regarding siting of the proposed new home. As you will note with the plan, we have tailored the new home to fit with all your requirements including the provision of two separate parking bays. Although the new home will be completely fire proofed we have observed your requested 6 metre space between the immediate homes plus the full 3.7 meters you required on the entrance. The measurements comply to all the site licence conditions.

The home will be a new residential home in the area and a low cost affordable home. Suitable for retired or disabled as well, we will be able to put the base in and the mains covering one area at a time so it has at least upheaval as possible.

The new home will be in an area that will not affect the driving in or out of the park or affect the residents parking bays. This will not change the access to the park for the emergency services and also we have plenty of parking in our car park. The plan of the new home will be designed to the best possible design taking into consideration the windows to immediate neighbour's, we will have an obscure window for the bathroom and the bedroom will backing onto no. 14 and no. 12. The home will be in keeping with the park and there will be an area of grass with curbs around the edge and a metal shed. It is our intentions to keep the park to a high standard and make you happy as well. Please feel free to telephone or come and visit if you need any more information and we will be more than happy to help.

Yours sincerely

Mr & Mrs Fitzgerald
