

### **PROJECT INTEGRA - ACTION PLAN**

#### **1. INTRODUCTION**

- 1.1 Project Integra is the adopted brand name for the Waste Management Partnership for Hampshire delivering waste management infrastructure and allied collection services to 7750,000 households across Hampshire. The Project Integra Partners are Hampshire County Council, the District Councils, Portsmouth City Council, Southampton City Council and Veolia. This report seeks the Council's endorsement for approval for the adoption of the Action Plan 2018-2021 for the Project Integra partnership.
- 1.2 The partnership has struggled to keep up with other partnerships in the country who have higher recycling rates but in fairness the partnership is still successful and is one of the best examples of joint working in relation to waste by virtue of the high level of diversion from landfill now being achieved, which is one of the highest of any County grouping.
- 1.3 A fundamental review of the "Hampshire Waste Partnership" has commenced and will be one of the key actions in the 2018-2021 Action Plan, which will focus on improved performance, a larger range of materials to recycle as well as reducing the overall cost of managing waste in Hampshire

#### **2. PROJECT INTEGRA DRAFT ACTION PLAN 2018-2021**

- 2.1 The Action Plan (Appendix A) is a three-year plan, and is the mechanism by which the Board receives its mandate to work on behalf of the partnership. It also sets out the costs of running the Board and associated joint activities of the partnership.
- 2.2 Section 3 of the Action Plan highlights the key developments at a national level in the waste management sector. Of particular interest is the announcement by Defra of a new "Waste and Resources Strategy", which is due for consultation later in 2018.
- 2.3 Section 4.1 of the Action Plan identifies 10 key areas of work which will be undertaken within the 3 years of the plan from 2018 to 2021. Authorities may approve the Draft Action Plan unreservedly or may approve it subject to a reservation in respect of any particular matter that it has concerns with. Where approval is given subject to such reservation, the Partner Authority's voting Member is not entitled to vote on the matter in question when it is subsequently considered by the Board, and any resolution of the Board on the matter in question does not bind that Partner Authority.
- 2.4 The appendices of the action plan also identify the contributions that New Forest District Council will pay towards the Project Integra Executive and the MAF for 2018/19. The overall figure for these 2 elements is £15,225. The budgeted income in 2018/19 for the sale of recyclable materials is budgeted at £418,000 for dry mixed recycling and £66,000 for glass. There will always be a fluctuation in the market price for all the various material streams but within the Project Integra Partnership we continue to seek out sustainable and profitable markets for all materials.
- 2.5 The performance against the 2015/18 action plan and the proposed actions identified

in the 2015/18 plan were discussed at January's Environment Overview and Scrutiny Panel, where Chris Noble, the outgoing Head of Project Integra, presented his annual report to the Panel.

### **3. FINANCIAL IMPLICATIONS**

- 3.1 The Council pay towards the Project Integra Executive and the MAF. The overall figure for these 2 elements in 2018/19 is £15,225, with the income in 2018/19 for the sale of recyclable materials is budgeted at £418,000 for dry mixed recycling and £66,000 for glass.

### **4. ENVIRONMENTAL IMPLICATIONS**

- 4.1 Project Integra and its actions via the Joint Municipal Waste Management Strategy and the Project Integra Action Plan have significant benefits for the environment. This action plan seeks to achieve high levels of recycling and a more sustainable and cost-effective approach to waste management in Hampshire.

### **5. CRIME AND DISORDER IMPLICATIONS**

- 5.1 None

### **6. EQUALITY AND DIVERSITY IMPLICATIONS**

- 6.1 None

### **7. CONCLUSION**

- 7.1 The Project Integra Action Plan, setting out the priorities for the next 3 years as well as the financial implications is identified in appendix A of this report.

### **8. RECOMMENDATION**

- 8.1 That the Environment Review Panel recommend to the Portfolio Holder for Environment and Regulation that Cabinet approve the Project Integra Action Plan 2018-2021, as attached at Appendix A to this report.

#### **FURTHER INFORMATION**

#### **BACKGROUND PAPERS**

Attached

## **Draft Project Integra Action Plan**

**2018-2021**

# 1 Introduction

- 1.1 Project Integra is a partnership of local authorities with responsibility for waste management in Hampshire, Portsmouth and Southampton. The long term waste disposal contractor Veolia Environmental Services (VES) is a non-voting member of the Partnership.
- 1.2 The Project Integra Strategic Board is constituted as a Joint Committee of the 14 local authorities, and is the decision making body for the partnership.
- 1.3 In line with changes to the constitution made in 2015, the PI Action Plan is a three year plan. The 2015-18 plan has come to an end, and this plan will cover the period 2018-21. The Action Plan sits underneath the Joint Municipal Waste Management Strategy, and sets out the medium to long-term actions for the partnership. Amendments to this plan can be made during this period, and progress will be regularly reported to the PI Strategic Board

## 2 PI aims and objectives

- 2.1 The refreshed (2012) Joint Municipal Waste Management Strategy (JMWMS) had the following overarching vision:

*“In period to 2023 Hampshire will manage the effectiveness of its sustainable material resources system to maximise efficient re-use and recycling of material resources and minimise the need for disposal in accordance with the national waste hierarchy.”*

- 2.2 The PISB also agreed, in 2012, the operational focus for its activities through a number of work streams as follows: *“Working to reduce costs across the whole system”* through:

1. Communication and behaviour change.
2. Waste prevention including reuse.
3. Recycling and performance improvements - for instance through reducing contamination, increasing capture of materials, improving income for materials, changing management arrangements.
4. Reducing landfill.
5. Joint working arrangements and activities.
6. Improve efficiency and effectiveness of services through collaboration with neighbouring authorities including SE7.”

## 3 National Developments in Waste and Resources

### 3.1 *Brexit and EU Legislation*

- 3.1.1 The UK's decision to leave the European Union will have a significant impact on the future make-up of waste related legislation.
- 3.1.2 Under the EU Waste Framework Directive, all Member States have a target to recycle 50% of household waste by 2020. In recent years, the UK recycling rate has plateaued. The most recent UK-wide figures indicate a rate of 44.3% in 2015. It is unlikely that the UK would meet this target. Whilst the target is applicable to the UK as a whole, it has never been cascaded down to local authority level.
- 3.1.3 In July 2014, the European Commission published a proposal to amend six waste-related Directives, as well as an action plan aiming to:
  - help turn Europe into a circular economy
  - boost recycling

- secure access to raw materials
- create jobs and economic growth.

3.1.1 Since 2014, this “Circular Economy Package<sup>1</sup>” has been subject to development and refinement, and negotiations between the different elements within the EU. It is likely that the package will lead to new recycling targets for Member States, and these could be in the region of 60-70% by 2030. The package could also introduce requirements for separate collections of food waste.

3.1.2 It is not clear whether the UK would be required to transpose the new legislation into UK law, as this will depend on the timing of Brexit. Depending on the UK’s future relationship with the EU, at least some elements of the Package could be relevant to the UK after 2019.

### 3.2 *Consistency Framework*

3.2.1 In October 2016, WRAP unveiled “A Framework for Greater Consistency in Household recycling in England.”<sup>2</sup> They had been commissioned by Defra to look into the potential benefits of greater consistency across the recycling journey – from packaging, to local authorities, to council, to reprocessors.

3.2.2 The framework’s vision was that “By 2025, packaging is designed to be recyclable (where practical and environmentally beneficial) and labelled clearly to indicate whether it can be recycled or not. It is a vision where every household in England can recycle a common set of dry recyclable materials and food waste, collected in one of three different ways.” This vision focussed on three key priorities:

- ❖ All households to be able to recycle the same core set of materials
- ❖ Fewer collection and sorting systems
- ❖ A common container colour system

3.2.3 Through various workstreams and working with partners, WRAP are working on moving towards the vision. Some of the work carried out so far includes:

- ❖ Further rollout of On Pack Recycling Labels on more consumer product lines
- ❖ Standardised contract documentation for WCAs
- ❖ Support to LAs, in particular in county areas where consistency is currently limited
- ❖ A packaging working group, which is working with industry to address some common problems, such as black plastic, PVC, and packaging contamination (e.g. springs in plastic spray bottles)
- ❖ A consultation on bin colours – PI responded to this

### 3.3 *Drinks Containers*

3.3.1 The Environmental Audit Committee (EAC) carried out an inquiry<sup>3</sup> in 2017 into plastic bottle and coffee cup recycling. The two key recommendations to Government were:

- Introduction of a 25p levy on disposable coffee cups
- Introduction of a deposit return scheme (DRS) for drinks containers (plastic, cans, cartons)

3.3.2 Running parallel to the EAC inquiry was a Defra Call for Evidence (CfE), looking at DRSs. Under such a DRS, consumers would receive a small deposit back, if they returned their used drinks containers to an appropriate collection point (most likely to be local supermarkets). A DRS could increase recycling rates and reduce litter. However, there is a lack of evidence of how such a scheme could affect LA recycling schemes, and in PI’s response to the CfE, it was

---

<sup>1</sup> [http://ec.europa.eu/environment/circular-economy/index\\_en.htm](http://ec.europa.eu/environment/circular-economy/index_en.htm)

<sup>2</sup> <http://www.wrap.org.uk/collections-and-reprocessing/consistency>

<sup>3</sup> <http://www.parliament.uk/business/committees/committees-a-z/commons-select/environmental-audit-committee/inquiries/parliament-2017/inquiry/>

suggested that Government would need to look at this more closely before introducing such a scheme.

- 3.3.4 In the aftermath of significant national media coverage of ocean pollution and recent issues with the Chinese recycling market, it is likely that the issue of plastic recycling in particular will be a focus for Defra in the short term at least.

### 3.4 *National Strategies and Reports*

- 3.4.1 During 2017 and early 2018, the Government released several strategies relevant to the waste and resources strategy. These are summarised in the table below:

Strategy document	Released	Key points
Industrial Strategy <sup>4</sup>	Jan '17	No mention of circular economy, but does promotion of well-functioning markets for secondary materials
Clean Growth Strategy <sup>5</sup>	Oct '17	Sister document to industrial strategy. Includes aim for zero food waste to landfill by 2030, and suggests support for separate food waste collections. Consideration on improving the incentives on offer through producer responsibility schemes
25 Year Environment Plan <sup>6</sup>	Jan '18	Four key aims relating to waste: <ul style="list-style-type: none"><li>• At the production stage, we will encourage producers to take more responsibility for the environmental impacts of their products and rationalise the number of different types of plastic in use</li><li>• At the production stage, we will encourage producers to take more responsibility for the environmental impacts of their products and rationalise the number of different types of plastic in use</li><li>• At the end of use stage, we will make it easier for people to recycle by:</li><li>• At the end of life/waste management stage, we will improve the rate of recycling</li></ul>

Also within the 25 Year Environment Plan, Defra commits to publishing a new Resources and Waste strategy in 2018: "It will set out our approach to reducing waste, promoting markets for secondary materials, incentivising producers to design better products and how we can better manage materials at the end of life by targeting environmental impacts." It is believed that a draft strategy will be consulted upon in autumn 2018.

### 3.5 *Waste trends*

- 3.5.1 At the time of writing, the latest statistical update from Defra covers the calendar year 2016. The official England waste from households recycling rate for 2016 was 44.9%. This rate includes for the first time the percentage of metal recovered and recycled from waste which has been through incineration. For 2016 this raises the waste from households recycling rate by around 0.7 percentage points. Residual waste treated increased by 1.3 per cent to 12.5 million tonnes in 2016 from 12.4 million tonnes in 2015. In broad terms, England's recycling rate has plateaued in recent years.

### 3.6 *Courtauld Commitment on food waste*

---

<sup>4</sup> <https://www.gov.uk/government/topical-events/the-uks-industrial-strategy>

<sup>5</sup> <https://www.gov.uk/government/publications/clean-growth-strategy>

<sup>6</sup> <https://www.gov.uk/government/publications/25-year-environment-plan>

- 3.6.1 WRAP have been working with retailers and manufacturers since 2005 via a series of “Courtauld Commitments,” aiming to reduce the weight and carbon impact of household food waste, grocery product and packaging waste, both in the home and the UK grocery sector. The latest commitment is known as “Courtauld 2025<sup>7</sup>.” PI is a signatory to this agreement, and has therefore committed to reduce food waste and engages in cross-sector programmes to achieve improvements across the supply chain.

## 4 PI Action Plan 2018-21

- 4.1 In order to meet the aims of the JMWMS and the challenges described, the action plan will consist of the following actions.

Action 1	Communications and Behaviour Change
<b>Detail</b>	<p>Increasing capture of and reducing contamination of materials collected for recycling by PI will have a significant impact upon whole system costs. There is no current county-wide communication programme. However, the following is required:</p> <ul style="list-style-type: none"> <li>• A focus on local communications by each partner authority.</li> <li>• When appropriate work together on communications where an approach will have a known impact or clear business case, and pursue external funding to this end, including partnerships with other sectors.</li> <li>• Sharing of best practice in communications among PI partners e.g. via Recycling officer group.</li> <li>• Development of an agreed set of FAQs, to ensure that messages across Hampshire are consistent.</li> <li>• PI Executive will continue social media programme</li> <li>• HCC to share results of Behavioural Insights work, and scale up activity depending on results</li> </ul>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Increasing material capture rates</li> <li>• Reducing partnership wide and WCA-specific contamination rates</li> <li>• Reducing MRF residue rate</li> </ul>
<b>How will this be measured?</b>	<ul style="list-style-type: none"> <li>• Monitoring capture, contamination and residue rates via the Materials Analysis Facility</li> <li>• Benchmarking of data with other LAs and MRFs</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• All PI partners</li> <li>• Led by Head of Project Integra</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• At partner level</li> <li>• External funding where available</li> <li>• Business cases presented where appropriate</li> </ul>
<b>Timescale</b>	2018-21

<sup>7</sup> <http://www.wrap.org.uk/content/courtauld-commitment-2025>

<b>Action 2</b>	<b>Impact of New Developments</b>
<b>Detail</b>	An estimated 64,000 households are expected in Hampshire by 2023. This will put significant strain on both waste collection and disposal infrastructure. The impacts require further investigation, to allow authorities to plan for future service provision. A PI Working Group has developed Terms of Reference to guide the work.
<b>What would success look like?</b>	Deliver a final report, to include recommendations for waste officers, planners and senior decision makers.
<b>How will this be measured?</b>	Successful delivery of final report and a model Supplementary Planning Document on waste and recycling.
<b>Responsibility</b>	PI Working Group
<b>Resources</b>	PI officers in the working group are investigating different subject areas and reporting back to the group on a regular basis.
<b>Timescale</b>	Final report by September 2018

<b>Action 3</b>	<b>Waste Prevention Plan (WPP)</b>
<b>Detail</b>	Implementation of separate PI WPP 2017-19, approved by PISB in June 2017 (further detail available within that plan). Key activity to include: <ul style="list-style-type: none"> <li>• Annual report on progress (June)</li> <li>• Bulky waste – improving diversion of bulky waste, via a mix of system changes and partnership working.</li> <li>• Organics – programme of activity around food waste reduction and home composting</li> <li>• Waste collection policies – reviewing and developing new waste collection policies that may reduce waste – collection frequencies, size and number of waste containers etc.</li> </ul>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Limit annual increases in residual waste to 0.5% per annum.</li> <li>• Reduce organic and bulky waste</li> </ul>
<b>How will this be measured?</b>	<ul style="list-style-type: none"> <li>• Waste tonnage data</li> <li>• MAF analysis</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Head of PI – monitoring of progress against WPP</li> <li>• Responsibilities around specific actions detailed in the approved WPP - all Project Integra authorities have a role</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• PI WP working group where appropriate</li> <li>• Resources allocated via HCC WP workstream</li> </ul>
<b>Timescale</b>	Approved plan of activity up to June 2019

<b>Action 4</b>	<b>Hampshire Waste Partnership Project</b>
<b>Detail</b>	<p>The Hampshire Waste Partnership Project will shape the medium to long term future for recycling services in the future. There are two strongly linked workstreams:</p> <ul style="list-style-type: none"> <li>• Development of a final business case for changes to input specification and configuration of MRF infrastructure – and implement recommendations as appropriate</li> <li>• Identify best way of reducing whole system costs via relationships between PI partners, and the tools to do so (constitution, MoU, JMWMS etc.)</li> </ul>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Increased recycling rates</li> <li>• Reduced whole system costs</li> </ul>
<b>How will this be measured?</b>	<ul style="list-style-type: none"> <li>• Waste data and MAF analysis</li> <li>• Monitoring of cost benefits</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Currently led by HIOWLA with PI support</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• At individual partner level as required</li> <li>• PI Strategy and Collaboration Group is supporting development of the project</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• Business case by summer 2018</li> <li>• Implementation timetable TBC based on outcome of business case</li> </ul>

<b>Action 5</b>	<b>Joint Working outside of PI</b>
<b>Detail</b>	<p>Ensure engagement with:</p> <ul style="list-style-type: none"> <li>• Waste partnerships (esp. in the south east region)</li> <li>• Other networks including National Association of Waste Disposal Officers</li> <li>• Central Govt, to influence future policy development – particularly important in 2018 with increased focus on plastics and Defra's development of a new waste and resources strategy</li> </ul>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Increased opportunities for performance improvement and reduced costs, and influence of future waste policy</li> </ul>
<b>How will this be measured?</b>	<ul style="list-style-type: none"> <li>• Commentary provided by head of PI in annual action plan update</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Led by Head of Project Integra</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• Officer time and resources as required</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• 2018-21</li> </ul>

<b>Action 6</b>	<b>Health and Safety</b>
<b>Detail</b>	<p>Through the PI group Common Approach to Safety and Health (CASH) ensure best practice shared and projects delivered by task and finish groups, including:</p> <ul style="list-style-type: none"> <li>• Reversing safely - engage with national working groups and develop resource pack for partners</li> </ul>
<b>Target</b>	<ul style="list-style-type: none"> <li>• Reduction in lost-time incidents in Hampshire</li> </ul>
<b>How will this be measured?</b>	<ul style="list-style-type: none"> <li>• Monitoring of H&amp;S statistics</li> <li>• Produce annual report for PISB on the progress made by the group</li> <li>• Influence national H&amp;S debate through multi-agency H&amp;S forums</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Head of Project Integra, Chair of CASH</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• Individual partner officer time.</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• Annual Report at June PISB.</li> </ul>

<b>Action 7</b>	<b>Glass Processing Contract</b>
<b>Detail</b>	<p>PI authorities have a joint contract for processing of glass collected at kerbside or via bringsites and HWRCs. Current contract ends in July 2018. The following is required:</p> <ul style="list-style-type: none"> <li>• Complete procurement process for processing of glass collected via kerbside, bring sites and HWRCs</li> <li>• Mobilise new contract, and monitor performance through first two years</li> <li>• Evaluate performance and make recommendation at end of initial two-year contract period</li> </ul>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Secure a value for money outlet for PI glass from 2018 and beyond. Achieve income levels at or above the national average.</li> </ul>
<b>How will this be measured?</b>	<ul style="list-style-type: none"> <li>• Monitoring of average values of collected glass. Other KPI monitoring via the new contract.</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Lead Head of Project Integra in partnership with HCC as managing authority for the contract, and a PI working group.</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• As detailed in the glass processing partnering agreement</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• 2018-2021</li> </ul>

<b>Action 8</b>	<b>Training</b>
<b>Detail</b>	<ul style="list-style-type: none"> <li>• Continue with existing joint training programme for front-line drivers (Certificates of Professional Competence) provided to EBC, FBC, NFDC</li> <li>• Renew CPC training post-2019</li> <li>• Identify other training opportunities</li> </ul>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Achieve better value for money and significant savings for Project Integra partners.</li> <li>• Produce annual report on progress.</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Lead Head of Project Integra</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• Project Integra Budget</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• 2018-21</li> </ul>

<b>Action 9</b>	<b>Waste Composition Analysis</b>
<b>Detail</b>	<p>At the October 2017 PISB, it was agreed that a county-wide waste composition analysis would be undertaken during 2018. This analysis will require p-planning and a procurement process, as well as analysis and a final report to inform various workstreams.</p>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• Delivery of full waste composition analysis including final report</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Head of Project Integra, HCC WP Manager, and a PI working group</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• £100k budget made up of contributions from all PI partners</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• 2018</li> </ul>

<b>Action 10</b>	<b>Hampshire Flytipping Strategy</b>
<b>Detail</b>	In February 2017 the PISB agreed that the Hampshire Flytipping Strategy <sup>8</sup> would be supported by PI via the governance systems already in place. Flytipping was an area of growing concern with the county. The strategy has the following vision: <i>“A future for Hampshire where we work together to ensure that all parties take responsibility for their waste, so as to bring about a significant reduction in the unacceptable social, economic and environmental harm caused by flytipping.”</i>
<b>What would success look like?</b>	<ul style="list-style-type: none"> <li>• The flytipping strategy itself contain three key aims and numerous objectives</li> <li>• The overall goal is a reduction in flytipping in Hampshire</li> </ul>
<b>Responsibility</b>	<ul style="list-style-type: none"> <li>• Flytipping Partnership and Project Officer (HCC)</li> <li>• Support from private and public partners and stakeholders</li> </ul>
<b>Resources</b>	<ul style="list-style-type: none"> <li>• Flytipping Partnership and Project Officer funded by HCC and jointly hosted by Trading Standards and Waste and Resource Management</li> <li>• Partner input to working groups and the overall strategy as required</li> </ul>
<b>Timescale</b>	<ul style="list-style-type: none"> <li>• Officer post is funded initially to July 2019</li> <li>• Flytipping Strategy has no end date but will be reviewed as and when appropriate.</li> </ul>

## 5 Resources

5.1 The forecast for the PI Executive and Materials Analysis Facility for the next three years is given in Table 1 below:

	<b>18/19</b>	<b>19/20</b>	<b>20/21</b>
<b>Expenditure</b>			
Staff costs	£79,767	£83,786	£88,005
Communications & Research SLA	£25,000	£25,000	£25,000
Other costs	£1,000	£1,000	£1,000
<b>Net Expenditure</b>	<b>£105,767</b>	<b>£109,786</b>	<b>£114,005</b>

Note that these are estimates only, and that more accurate forecasts will be given annually in the annual report on Action Plan progress. Authority contributions are based on:

- Executive - total number of households with elements for collection (80%) and disposal (20%);
- Materials Analysis Facility – one third WCAs (evenly split), one third WDAs (split no. households), one third VES.

The contributions for each authority are set out in Table 2.

5.2 Proposals to utilise the current underspend held on the PI account will be agreed by the PI Strategic Board as and when required.

<sup>8</sup> <http://documents.hants.gov.uk/waste-prevention/fly-tipping-strategy.pdf>

- 5.3 Individual partner authorities will need to give consideration to how they will support the actions in this plan, through staff or other resources, to ensure the partnership achieves its objectives.

Table 2

## Authority Contributions

	2018-19			2019-20			2020-21		
	PI Executive	MAF	Total	PI Executive	MAF	Total	PI Executive	MAF	Total
Basingstoke	7,671	6,785	14,456	7,962	7,021	14,983	8,267	7,302	15,569
East Hampshire	5,338	6,785	12,123	5,540	7,021	12,561	5,753	7,302	13,055
Eastleigh	5,649	6,785	12,434	5,863	7,021	12,884	6,088	7,302	13,390
